PREFACE

The **REPERTOIRE GENERAL (GENERAL LIST** of **MERCHANT SHIPPING)**, issued yearly since 1870, by the Administration of the BUREAU VERITAS, may be considered a complement to the **VERITAS REGISTER** and is of obvious interest to all branches of maritime commerce.

The work is complete in two volumes : the **SAILING VESSELS** volume contains an alphabetical list of all **seagoing merchant** sailing vessels, of 50 tons gross and upwards, of all countries of the world, followed by a separate list of sailing vessels fitted with auxiliary engines or motors.

It contains also : a list of changes of name, a list of vessels having compound names, — a list of the signal letters of all nations and a list of owners of sailing ships.

The **STEAMERS** volume contains an alphabetical list of all **seagoing merchant** Steamers and Motor vessels, of 100 tons gross and upwards, of all countries of the world, excepting **barges, ferries, dredgers, yachts** etc. and vessels for **inland navigation.**

Those vessels however of the Great American Lakes, which are partially employed for ocean service, are included in this list.

The following lists are also to be found in this volume :

Lists of petroleum carrying steamers, — cable ships, — changes of name, — compound names, — steamers of 10.000 tons gross and upwards, — signal letters of all nations, — Builders of iron and steel ships, — Owners of steamers and motor vessels *in order of Nationality* — Dry docks, Slips, etc.

During recent years the following additions have been made :

A list of vessels fitted with refrigerating appliances,

A list of call signals (wireless telegraphy),

A list of salvage companies.

Each of the two volumes contains also a table showing general statistics, arranged according to nationality, of the vessels therein volume and a table showing the statistics of the vessels, built, bought or sold in the different countries, during the preceding year.

The Administration of the BUREAU VERITAS forward to subscribers post free and included with the subscription, their « Monthly List of Wrecks and Casualties », published since 1866.

This list gives, alphabetically arranged, with their number of inscription in the **REPERTOIRE GENERAL** of the current year, the names of all vessels lost or having sustained casualties during the month, naming the voyage and the nature and date of the loss or accident. Steamers and sailing vessels are given separately, and a recapitulation at the end gives statistics, arranged according to nationality, of the different causes of such losses and casualties to both sailing vessels and steamers.

Paris, September 1917

A. BORJA DE MOZOTA,

ACTING DIRECTOR.

SUBSCRIPTIONS

The Subscription to the complete work is £ 3-10 s. per annum, or to the volumes separately : — STEAMERS £ 2-., SAILING VESSELS £ 1-15 s. per annum. — Subscribers may apply to the Administration, Paris, 31, rue d'Offémont, to the London Office, 155, Fenchurch Street, London E. C. or to the Agents and Surveyors.

Nota. — In the interest of subscribers, and in order to avoid any delay in the delivery of our publications, subscriptions are continued from year to year no application for renewal being necessary.

Notice of cancellation must be given at least three months before the date of publication of the Repertoire General which appears about the 15th of September.

PUBLICATIONS OF THE BUREAU VERITAS

The Register (with fortnightly supplements).

The Register, published annually since 1828, appears on the 1st of January, and gives alphabetically the names of all sailing or steam vessels of which the construction or repairs have been superintented by the Surveyors of the Society stationed at the principal ports of the world.

The Register gives, for each vessel, the class assigned, expressing the degree of confidence to be placed in the vessel; as also complete technical information regarding the hull, engines, and boilers.

The Repertoire General of Merchant Shipping.

This work, published in two volumes (one for sailing vessels, the other for steamers), contains a complete list of all merchant vessels in the world, above 50 tons gross for sailing vessels, and above 100 tons gross for steamers. It gives for each vessel information as to construction, type, ownership, method of propulsion, port of registry, etc.; and may be considered as the complement of the Register.

It has been issued annually since 1870, and appears about the 15th September.

Monthly List of Wrecks and Casualties.

The "Monthly List of Wrecks and Casualties", which forms a Supplement to the "Repertoire General", has appeared since 1866. This publication reports the casualties that have happened to vessels, in alphabetical order of their names, with the nature of the casualty, the date of its occurrence and the voyage engaged on. The list is divided into two parts, Steamers and Sailing vessels, and sums up every month, in statistical form, according to flag and the nature of the casualty, all losses and accidents which have been recorded.

Annual Summary of Wrecks and Casualties.

This is a revised summary of the information given in the "Monthly List of Wrecks and Casualties". The vessels are entered in alphabetical order, and the accidents that have occurred during the twelve months are grouped under each name. The names of the vessels are rearranged in alphabetical order, so that all casualties which have happened to any vessel, during the twelve months, can at once be seen. Other useful Statistical Tables are contained.

Rules for the construction and classification of steel vessels.

Rules for the construction and classification of wooden vessels.

Rules for the construction and classification of vessels for inland navigation.

Rules for the construction and classification of wooden, composite, and steel yachts.

Rules for the construction and classification of motor boats and for the fitting of explosion engines into vessels of all kinds.

Extract from the Rules and Regulations for the Building of Steel and Iron Works (Chapter X. — Tests of Materials, Anchors, Cables and Ropes, etc.).

Rules for the testing of materials not intended for Shipbuilding and Bureau Veritas Specifications.
